

## SFQCW-266nm Series CW Single-frequency YAG Lasers

The DPSS CW deep UV laser series SFQCW-266, diode pumped continuous wave solid state laser, comes with a resonant frequency conversion stage, emitting a fixed wavelength of 266nm. The laser head is contained in a sealed aluminium housing, which allows operation in a wide range of environmental conditions. Heat removal from the laser head is done by air convection.

The SFQCW-266 plug & play laser comes with a control unit, allowing either push button control or remote control operation via serial (RS232 & USB) interface. The lasers offer excellent beam quality with an M2 below 1.3 , beam divergence below 0.8mrad (full angle), low intensity noise below 0.5% rms (100 kHz-10MHz) and a good power stability (<1% in 8 hours). These CW laser units are the proper tools for industrial use and intensive R&D applications as Raman Spectroscopy, Wafer inspection and Photoluminescence where a long coherence length is required.

### Features:

- Single frequency
- Low noise
- TEM00
- Long coherence length of 1000m
- High beam quality M2 < 1.3
- Small footprint (rugged and compact)
- Conduction cooling
- User friendly
- Line width < 300 kHz

### Applications:

- Raman
- Inspections
- Analytics
- DVD mastering

Notes:

1. After 30 minutes warm-up in the temperature range 20 - 35°C, temperature change < 1°C/hour.
2. The exit window is equipped with the Manual Window Shifter (MWS) in case of external photo contamination.
3. This laser system is not equipped with the Automatic Crystal Shifter (ACS) due to the lower power densities on all internal optical elements.
4. Position and angle of static alignment tolerances are specified with regard to laser beam exit.
5. Length of laser head is +50mm expanding by using purge interface.

## CW DPSS All-solid-state Lasers

We offer all series of CW diode-pumped solid-state lasers with laser wavelengths at 473nm, 532nm, 589nm and 1064nm with maximum laser power 4W. These lasers are widely used in scientific, medical, industrial and entertainment applications. We have many years of experience in researching and developing DPSS laser systems.

- Laser power is stable and adjustable
- Protected with overheating and over current
- Can be externally controlled with high speed modulation
- Suitable for scientific research, medical treatment, biological engineering, stage laser show, etc

### List of Main CW DPSS Lasers

Part Number	Wavelength	Laser Power
ST-I-N-473-xxx	473nm	20/50/100mW
ST-II-N-473-xxx	473nm	100/150/200mW
ST-I-N-532-xxx	532nm	50/100/150/200/300mW
ST-II-N-532-xxx	532nm	0.5/1/1.5/2/3/4W
ST-III-N-532-xxx	532nm	5/6/7/8/10W
ST-II-N-589-xxx	589nm	50/100/150/200/300/500/800/1000mW
ST-II-N-1064-xxx	1064nm	0.5/1/1.5/2/3/4W

Remarks: 1) In the part number, xxx means laser power in mW or W; 2) Other power levels available upon request; 3) fiber output delivery available upon request; 4) There are 2 or 3 average power stabilities for all lasers and default is 5%; 5) There are 2 types of power supplies: integrated and OEM. The power input of integrated is 110V-220VAC and the power input of OEM is 12VDC.
